DCI/IC 75-1547

24 December 1975

MEMORANDUM FOR: D/DCI/IC

SUBJECT: Comments on Draft Letter of Instruction for C/IHC

1. I have reviewed the draft LOI for C/IHC as sent forward by the Coordination Staff. This is a sound draft, and I request that you approve it just about as written. My few requests for changes are as follows.

2. Para. 3a. The text should end after the words "Intelligence Community" in line 4, striking out all that follows. The portion struck out is too precise for this kind of document. Moreover, it is unnecessary since the force of the omitted words is effectively contained in the reference to meeting the 1976 Objectives, and D/DCI/IC can promulgate (and change) specifics in that document.

3. Para. 3f: capitalize "Distributed Production Policy".

4. Para. 4c: In line 4, insert semicolon after "communications" and again after "display". Otherwise there are so many commas it is confusing.

5. Para. 3g. The draft asks at the outset if this paragraph is appropriate. My reply is that the subject of community inter-netting of telecommunications systems is one of the most important in our business. I feel very strongly about the need to have this topic included specifically in the LOI for C/IHC.

6. I request you add a new subparagraph, as follows:

" . Support and participate in the continuing program of Intelligence and Operations Watch Centers Conferences. Provide information on community communications networks and facilities and information handling procedures relating to crisis and emergency operations."

Rationale for addition: we are now participating in these Conferences and through the IHC subcommittee structure we have a capability to provide information for future Conference work. Our efforts will be more effective if this assignment is specified.

INTELLIGENCE INFORMATION HANDLING COMMITTEE
(IHC)

The Intelligence Information Handling Committee of USIB is responsible for facilitating the timely and coordinated handling of intelligence and intelligence information within the intelligence community and promoting the continuous improvement, integration and effective use of community information handling resources. The IHC meets regularly on a monthly basis and on special occasions as required. The Committee is composed of representatives of CIA, State, DIA, NSA, Treasury, AEC, FBI, Army, Navy and Air Force. The Chairman is a member of the D/DCI/IC Staff. The IHC is supported by a full time Support Staff which is headed by a CIA representative with other personnel detailed from CIA, State, DIA and NSA.

The Committee submits an annual report to USIB on its activities and for the purpose of reporting on community information handling activities. In addition to the normal dissemination a copy is sent to the President's Foreign Intelligence Advisory Board and to Dr. Kissinger, Presidential Assistant for National Security Affairs.

An inventory of intelligence information handling systems is published annually. The IHC has recently initiated studies of intelligence data exchange in the Washington area and indications and warning and related telecommunication needs. The IHC has sponsored the development of a Community On-Line Intelligence System (COINS) experiment (teleprocessing/computer terminal information exchange network). The IHC has sponsored the development and implementation of an Information Science Center for the community with a curriculum on information science applications to intelligence.
